

Mexican Wolf Blue Range Reintroduction Project Telemetry Flight Locations for the Week of September 15, 2014.

The Reintroduction Project provides the public with information on wolf locations with the following caveats: (1) inclement weather can limit the availability and quality of location information; (2) location information is largely limited to radio-collared wolves and un-collared wolves associated with them; (3) Supplementary locations are given for wolves that were not found during the flight, thus the date of the most recent location may differ from the flight date; and (4) wolves are mobile, so wolf location information tends to be outdated from the moment it is collected. Again, the prudent assumption for any person is that Mexican wolves might be present in any part of the Blue Range Wolf Recovery Area at any time.

Collared Wolves in Arizona:

9-15-14 Hawks Nest Pack (AF1280 and AM1038)

Located 3 miles west of Gobbler Point and 4 miles southeast of St Marys Lake.

9-13-14 Rim Pack (AF1305 and AM1107)
